

Health Pro Active

The Future of Health

“A New Way of Mining : Health Mining”

With the launch of its groundbreaking product, Health Pro Active, Playpal introduces a solution that will, not only disrupt, but completely revolutionize the landscape of pro active health as we know it.

With an exponential growth of devices, smart gadgets and health tech apps, a connected and proactive approach is now the pathway to optimal health. That's where Health Pro Active can help, offering a unique collection of integrated parts that allow each person to become a part of Playpal's health ecosystem by:

- **Consolidating all the health and wellness data by integrating with IOT devices to create a health profile that makes all the information that is needed, simple, accessible, and secure (via international security standards).**
- **Using the power of AI to provide predictive analysis along with health goals & recommendations tailored specifically for each person.**
- **Providing each person with the means to quantify their health by calculating a personalized “HICO Score” based on Playpal’s Health Capital Model.**
- **Empowering you with the ability to transform your health into monetary wealth with “Health Mining”. Here’s each person’s chance to get rewards and make money while improving their health!**

There are 3 major elements that make up Health Pro

The Playpal Platform, The PlayPoints, and Playpal partner IOT devices

The Playpal Platform places Health Pro at the heart of its health ecosystem. With the Health Pro Active product, can access your recommendations, goals, HICO score, and health visualizations on it.

Health mining is a novel concept that Playpal is incorporating into Health Pro Active to allow you to win rewards and money via Playpal's very own PlayPoints.

Health Pro offers a wide variety of state of the art health-tech devices (from Playpal partners) that seamlessly integrate with the platform.

EEG Cool Headband

Fitness Ring

Glucometer Patch

TicWatch

Smart Shoes

Abit Glucometer

Users can integrate their wellness and health products with The Playpal Platform, and Health Pro Active will harness all of their health data, process it, and use it to keep track of their activity and eating habits. Data inputs from these products will get processed by Playpal, which will then reward users with PlayPoints 'mined' or earned from healthy actions. So, you can earn actual money, just by investing in your health!
